

# 10th IFAC Workshop on Time Delay Systems

June 22-24, 2012 Northeastern University, Boston, USA

## FLASH INVITATION TO HANDS-ON DEMONSTRATION DURING WORKSHOP

We are exploring one-of-a-kind event during the Workshop this year. We invite those participants with **portable experimental set-ups, hands-on software, video-uplinkable real-time experiments** to contribute to this section of the Workshop. Options are endless. We need your ideas as well.

**The objective** is to engage the participants actively in the experimental/interactive work related to the TDS research.

Do you have something to display? Come and make this exploration succeed...
