Northeastern University  
Department of Chemical Engineering  
Engineering Week Trivia Night Rules and Regulations

Prize: Picture of winning team will be hung in the Chemical Engineering office for the next academic year.

Teams:
- Teams shall consist of only 6 members (5 core members and only 1 alternate). The 5 core members will be the members of the team participating in the Trivia Night. The alternate individual will replace one of the core members if due to unforeseen circumstances, one of the core members cannot make it the night of the event. Note: The team members you start the Trivia Night with must be the same team members that you progress through each round with. Thus, you will not be allowed to sub in/out an alternate member with the core members if your team.

- The team can consist of either undergraduate students, graduate students, staff or faculty associated with the Chemical Engineering Department of Northeastern University. Give your team an interesting name!

- Each team is required to sign up on the Engineering Week Website. If you have any problem registering on the website, please send an e-mail of the list of members (5 core and 1 alternate) with team name to Adedokun Adediji Adedoyin (adedoyin.a@husky.neu.edu) at least 48 hours (23rd of February, 2015) before the date of the event.

Rules:
- All participants will be required to hand in their phones before the event.

- At the beginning of the event each team will be given a blank page in which they fill out their answers.

- Teams will be selected at random and grouped into different pools. So if we have fifteen teams sign up, there will be 3 pools of five teams.

- First round:
  1) You will have 35 seconds to read, discuss and write down the answer to the question presented?
  2) There will be a total of 15 questions in this round.
  3) The top team from each pool will be allowed to enter into the next round.
Tie-breaker:

- In the case that there are multiple teams that are tied for first place, we will enter a sudden death round. Teams will be required to answer questions one after the other. The question will be presented on the screen and they will have the same time frame (35 seconds) to submit an answer. If they get the answer wrong, they are eliminated. If they get the answer right, they keep on going progressing in the sudden death round until we get our fourth team. If none of the teams get the answer right, they all stay in the competition.

- Semi-final round:

  1) You will have 35 seconds to read, discuss and write down the answer to the question presented?
  2) This will be a head to head round.
  3) There will be a total of 10 questions in this round.
  4) The top teams from each pool will face each other.

Tie-breaker:

- In the case each team in the head to head semi-final round get the same number of questions right they will enter a sudden death round. Teams will be required to answer questions one after the other. The question will be presented on the screen and they will have the same time frame (35 seconds) to submit an answer. If they get the answer wrong, they are eliminated. If they get the answer right, they keep on going progressing in the sudden death round until we get our winner.

Final round:

  1) You will have 35 seconds to read, discuss and write down the answer to the question presented?
  2) This will be a head to head round.
  3) There will be a total of 10 questions in this round.

Tie-breaker:

- In the case each team in the head to head final round get the same number of questions right they will enter a sudden death round. Teams will be required to answer questions one after the other. The question will be presented on the screen and they will have the same time frame (35 seconds) to submit an answer. If they get the answer wrong, they are eliminated. If they get the answer right, they keep on going progressing in the sudden death round until we get our winner.
