Congratulations on your acceptance to the Information Systems program at Northeastern University’s Silicon Valley Campus!

Please remember to confirm your enrollment at Northeastern. You will not be able to preregister for classes (information below) until you confirm enrollment. You can confirm your enrollment by logging into your application account and paying the enrollment deposit.

As an Information Systems Silicon Valley student, you are required to complete INFO 5100, Application Engineering Development, and INFO 5101, Lab for INFO 5100, in your first term. These are the only required courses in the Information Systems program and it is an important building block for your subsequent courses. Your second course will be the first elective course in your program. We have five different elective options for our first-year students that will help you develop the skills you will need to be successful throughout the rest of your program.

Professor Kal Bugrara, the Director of the Information Systems program and your Academic Advisor, has created the following advising guide for you to refer to as you choose your courses for this Spring:

Required:

INFO 5100 (required), Application Engineering and Development: Students will learn innovative software programming techniques that will enable them to properly design and build any kind of application quickly. Through hands-on weekly lab sessions, students practice the development of applications as an assembly of components. Object-Oriented techniques for building business architectures that map to software applications will be introduced. You will learn how to master ways of taking vague requirements and turn them into systems of ecosystem scale. This class was designed to meet the needs of engineering students with a limited programming background. Students who do have a programming background will learn how to design and architect software the right way.

Advisor’s Note: This class with its emphasis on solid design of socio-technical systems is the corner stone of what we do in IS.

Section Available: CRN 37632

INFO 5101 (required), Lab for INFO 5100: Part of your INFO 5100 class

Section Available: CRN 37945

Elective Choices:

INFO 6205, Program Structure and Algorithms: This class is recommended for students who have had programming experience before but lack the algorithmic approach to solving complex programming challenges. The class covers all kinds of data structures from stacks, queues, trees, graphs, and algorithmic performance complexity. In addition, the class covers various problem solving techniques such as divide and conquer, dynamic programing, randomized and greedy algorithms, backtrack search, etc. After the completion of this class you will be in a
position of solve any programming problems. Though this class is optional, is highly recommended for students aiming to be software developers.

Advisor’s Note: There is a lot of technical work involved here, so it will be a challenge along with the Application Engineering class. Students with a strong technical background may wish to take up this challenging opportunity.

Sections Available: INFO 6205 CRN 37887

**To register, please email Haley Lyons at h.lyons@northeastern.edu. Make sure to include your NUID number and the CRN (37887). It will also help Haley if you let her know you are a Silicon Valley student!

INFO 6210, Data Management and Database Design: For the student who has no background in databases and wants to know what is involved in the design and programming of databases and wants to maximize technical skills. A good foundation for those who want to focus on data management, business intelligence, data science, etc. or who want to make these areas their career objectives.

Advisor’s Note: This class will prepare you well for Web Methods and Tools in the Spring semester.

Sections Available: INFO 6210 CRN 33899 (online)

INFO 6215, Business Analysis and Information Engineering: This class provides an over view of the software life-cycle with special emphasis on client engagement, requirements gathering, use-case development, UML class diagrams, etc. This is an excellent class for students who are new to the software industry and want to take their time in building their programming skills.

Advisor’s Note: The class complements the Application Engineering class very well

Sections Available: INFO 6215 CRN 30968 (online)

In addition, we have the following two on the ground courses in Silicon Valley

Web Development Tools and Methods - 37885 - INFO 6250 (Silicon Valley, CA) - Credits 4

Cryptocurrency and Smart Contract Eng. - 37733 - INFO 7500 - (Silicon Valley, CA) - Credits 4

Frequently Asked Questions
How do I register?: Please enter the CRN numbers listed above directly into your registration worksheet. Please note that these sections are not available to view online as they are reserved for Silicon Valley students only. You will not be able to register for these classes using the search classes feature and MUST enter the CRNs directly. If you need help navigating to your registration worksheet on your MyNEU account please watch the following webinars for instructions on how to register using your MyNEU account: ♦ Course Search Webinar: http://www.northeastern.edu/registrar/webinar-search.html ♦ Course Add/Drop Webinar: http://www.northeastern.edu/registrar/webinar-adddrop.html. Please email Haley Lyons at h.lyons@northeastern.edu with the CRN you’re your NUID. Make sure to mention you are a Silicon Valley student. Students will be accommodated on a first come first serve basis. If the class fills you will have to join a different elective that has seats.

What if I already registered for classes?: Please drop them immediately, unless they are the courses listed above. As a Silicon Valley student you want to be very careful that you are registered for Silicon Valley sections! The sections that you see published online are for the Boston campus. We hide the Silicon Valley classes to make sure the only people who can register for them are Silicon Valley students.

What if I do not get the elective I want? If your first preference fills, please sign up for your second preference (and so on). The schedule is dynamic and students will continue to change their registrations up until the start of the term so there is still an opportunity for you to get into your first choice elective this Spring. Please make sure you are always registered for 8 SH if you are a full time student.

Can I take an elective other than the five listed above?: No. These classes were chosen because they are appropriate for first term students. Please refer to the advising guide to select the class most relevant to your interests.

Can I skip the Application Engineering class (INFO 5100) or take it later in the Spring or Summer?: No, you must take INFO 5100 this Spring. The class is essential for advancing yourself through the program and engaging in a successful co-op experience.

Am I allowed to take three courses?: No, Information Systems students are limited to two courses each term. Based on feedback from our students we found that three courses were too demanding, especially in terms of final exams and projects. All of our courses require projects that count as much as 30% of your final grade and it is extremely hard to complete three of these a term. No exceptions to this policy will be considered until after your first year.

Can I take courses from other departments?: The only other department Information Systems students are allowed to take classes from is CSYE (Computer Systems Engineering). CSYE is a
sister program to IS and is being repositioned to focus exclusively on big-data technologies and programming platforms.

Can I transfer credit from other universities?: No. Professor Bugrara firmly believes that all 32SH should be taken within the program at Northeastern University to uphold the integrity and continuity of the program.

What is the duration of the Information Systems Program?: You are required to take eight courses, for a total of 32 credits. The program takes a minimum of three semesters to complete. The typical student takes 2.5 years to complete the program, which includes an eight month Co-op.

Is there funding or Teaching Assistant jobs available for first year students?: Unfortunately, there are no funding options in your first year. TA positions are filled by second year students only. You are expected to be fully dedicated to achieving academic success in the first year of the program.

Am I required to bring a laptop?: Yes. You must bring a high-quality laptop with a minimum of 8 GB memory AND a strong (4 hour) batter life- this is required for the Application Engineering course.

Am I eligible for Co-op?: You are not eligible for co-op the first two semesters of your program, during which your focus will be strictly academic. You are allowed to begin your first co-op after the Fall semester ends. During your last semester of study (in your second year), you must be fully on campus as a Full Time student, even if you are eligible to be on co-op. According to government rules and regulations, co-op is an educational opportunity to strengthen your engineering skills --not a job pursuit.

How do I register for the Co-op course?: One of the requirements to becoming eligible to go on co-op is to take ENCP 6000, Career Management for Engineers. This course will be available in both the Fall and Spring terms. Please see the information above to register for the ENCP 6000 course this Fall.

How long can I go on Co-op? Co-ops are a minimum of four months and a maximum of eight months. You can start a co-op in May after the Spring term ends or in December after the Fall term of your second year ends.

Will I get a bill after registering for classes? Yes, your first e-bill is generated when you register for your courses. You will receive an e-bill from the University with instructions on how to pay the e-bill. If you have questions about payment, please contact the Student Financial Services office directly: http://www.northeastern.edu/financialaid/contact/.
How do I get a MyNEU account?: After you confirm your enrollment, you will be able to utilize your MyNEU portal using this link, http://myneu.neu.edu/cp/home/displaylogin. If you have not set up your MyNEU account, login to your electronic application and look for instructions to do so: https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=neugrad

For more information about beginning your program at Northeastern University, please read your acceptance letter in full.

We look forward to welcoming you to the Graduate School of Engineering!

Sincerely,

Graduate School of Engineering Northeastern University
