Congratulations on your acceptance to the Telecommunication Systems Management program at Northeastern University!

Please remember to confirm your enrollment at Northeastern. You will not be able to preregister for classes (information below) until you confirm enrollment. You can confirm your enrollment by logging into your application account and paying the enrollment deposit.

An important part of your first term as a TSM student is registering for the right classes. Professor Peter O’Reilly, your Academic Advisor, has included his recommendations for your first term classes below. Please register as soon as you are able to to ensure you have a spot in the course.

As a Telecommunications System Management student you should register for two courses and a lab in your first term. Professor O’Reilly recommends you take the following classes in your first term:

1. **TELE 5330 (34637) - Data Networking**

2. **TELE 5331 (34639) - Lab for Data Networking**

    **AND**

    *(one of the following)*

3. **TELE 5310 (34608) - Fundamentals of Communication Systems**

    **OR**

4. **TELE 5340 (36109) – Telecommunications Public Policy and Business Management**

    **OR**

5. **CSYE 6200 (34827 or 37364) – Concepts of Object-Oriented Design**

*Waiver for TELE 5310:* In the past, many incoming TSM students have requested a waiver from the core course TELE 5310, Fundamentals of Communication Systems, on the grounds that they have covered much of this material in their undergraduate studies. Any student who wishes to waive this course will need to pass a test that will be administered in the week prior to the start of Spring 2017 courses. You will have only one opportunity to take the waiver test, which must be taken before your first semester on campus. Students who have taken a course similar to TELE 5310 (and earned a grad of ‘B’ or better) from another graduate program at Northeastern University or from another U.S. graduate institution, may request an exception to the waiver requirement. **No other exceptions to the waiver requirement will be approved.**

**TELE 5310 vs TELE 5340, or CSYE 6200:** Students who believe they may qualify for a waiver for TELE 5310 should register for TELE 5340 or CSYE 6200 and take the waiver test during their first week on campus. TELE 5340 requires a significant amount of reading and writing and should only be taken by first term students comfortable with speaking and writing in English. CSYE 6200 is a good choice for students looking to build their Java knowledge.
What if I have questions regarding choosing courses or course registration?: You will have the opportunity to meet with your Academic Advisor, Coop team, and Student Services Advisor during your department orientation. Please wait until you have attended the department orientation to get these questions answered. If the class is full and you can’t add yourself to the waitlist then please send us an email at support@husky.desk-mail.com. For all other questions, please wait until you attend the orientation.

How do I register for the co-op course?: One of the requirements to becoming eligible to go on co-op is to take ENCP 6000, Career Management for Engineers. This course will be available in both the Spring and Fall terms and you will learn more about it at Orientation.

What if my course is full?: Don’t panic! First of all, we will ensure that all new incoming students will have the opportunity to take the required TELE 5330/TELE 5331 courses in your first semester. Second, enrollments are always shifting as students get co-ops or change their course registrations. If a seat isn’t available in your preferred classes right away you can join the waitlist. To join a waitlist enter the class CRN (the 5 numbers in parentheses next to the course number above) directly into your registration sheet and hit submit. You will then have an option to select “waitlist” from a drop down menu. The waitlist system will automatically inform you when a seat opens up- just log into your account and accept it within the 24 hour time limit!

Meeting with the Director of the TSM Program: You will have an opportunity to meet with Professor O’Reilly, the Director of the Telecommunication Systems Management program and your Academic Advisor, before the start of the Spring 2017 term. If you would like to register for courses other than those listed above, please discuss this with Prof. O’Reilly at that time. You will be able to easily add or drop courses using the online registration system for the first two weeks of the term. Please note that no individual meetings with Professor O’Reilly will be scheduled before Orientation in January.

Will I get a bill from registering?: Yes, your first e-bill is generated when you register for your courses. You will receive an e-bill from the University with instructions on how to pay the e-bill. If you have questions about payment, please contact the Student Financial Services office directly: http://www.northeastern.edu/financialaid/graduate/index.html.

How do I get a MyNEU account?: After you confirm your enrollment, you will be able to utilize your MyNEU portal using this link, http://myneu.neu.edu/cp/home/displaylogin. If you have not set up your MyNEU account, login to your electronic application and look for instructions to do so: https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=neu-grad

How do I register for classes?: Please watch the following webinars for instructions on how to register using your MyNEU account:
♦ Course Search Webinar: http://www.northeastern.edu/registrar/webinar-search.html
♦ Course Add/Drop Webinar: http://www.northeastern.edu/registrar/webinar-adddrop.html

For more information about beginning your program at Northeastern University, please read your acceptance letter in full.
We look forward to welcoming you to the Graduate School of Engineering!

Sincerely,

Haley Jordan Lyons
