**Year Two @ NEU**

April 13, 2016  Volume 3  Number 7

---

**Enjoy your Summer Break**

You deserve to rest and unwind from a busy Spring semester. Utilize this summer to continue focusing on your hobbies and discovering new passions. Try something that you have wanted to do or simply relax by reading a book for pleasure. If you are interested in focusing on your personal development, take another look at your resume. Update it frequently so it is available in a moment’s notice. Make sure to include your participation within the Northeastern community as well as other outside skills that you have gained.

---

**Sophomore Success Strategy: Reflect On Your Semester**

The end of each semester is a great time to reflect on your experiences. What are some of your proudest accomplishments? What are some areas you would like to improve? What are some activities that you would like to continue your participation? What are some new things that you are interested in trying? It is never too late to participate in activities to help your personal and professional growth, or to switch strategies to help you succeed.

---

**Wise Words of Wisdom from Husky Engineers**

“Follow your passions and the rest will come naturally. Many student participate in activities or take on research labs or extra work they don’t actually enjoy because it “looks good on a resume.” Don’t fall into this trap! If you do something you enjoy, you never work a day in your life.”

- Alyssa Gang, Electrical & Computer Engineering ’18

---

**Just a thought …**

“You don’t learn from experience; you learn from reflecting on experience.”
- Ken Bain

---

**Resource Reminder!**

Professor and TA’s office hours

1. Be prepared. Look through your textbooks and class notes to recognize areas that cause confusion. Note page numbers, key concepts and ideas, and bring all materials to the session with you.
2. Ask questions. Ask the professor or tutor to help you solve a practice problem. Ask about specific concepts and ideas. Take notes to help you recall the information.
3. Within 24 hours of your visit, make sure you truly understand the information. It is in your best interest to continue visiting your professor or TA to reinforce the information.
