Congratulations on your acceptance to the Information Systems program at Northeastern University!

Please remember to confirm your enrollment at Northeastern. You will not be able to register for classes (information below) until you confirm enrollment. You can confirm your enrollment by [logging into your application account](#) and paying the enrollment deposit. If you have any questions regarding this process, please reach out through the [Graduate Admissions Support Center](#).

As an Information Systems student you are **required to complete INFO 5100, Application Engineering Development, in your first term.** This is the only required course in the Information Systems program and it is an important building block for all of your subsequent courses. Your second course will be the first elective course in your program. We have several different elective options for our first year students that will help you develop the skills you will need to be successful throughout the rest of your program.

Professor Kal Bugrara, the Director of the Information Systems program and your Academic Advisor, Megan Sykes, has created the following advising guide for you to refer to as you choose your courses for this Spring.

**INFO 5100 (required), Application Engineering and Development:** Students will learn innovative software programming techniques that will enable them to properly design and build any kind of application quickly. Through hands-on weekly lab sessions, students practice the development of applications as an assembly of components. Object-Oriented techniques for building business architectures that map to software applications will be introduced. You will learn how to master ways of taking vague requirements and turn them into systems of ecosystem scale. This class was designed to meet the needs of engineering students with a limited programming background. Students who do have a programming background will learn how to design and architect software the right way. This class with its emphasis on solid design of socio-technical systems is the cornerstone of what we do in IS.

**Sections Available:**
- **Section 03:** Saturdays 12:00 – 3:00 PM [CRN 35886](#)

**INFO 5101 (required), Lab for INFO 5100:** This is a required two-hour class session complementary to the main lectures of INFO 5100.

**Sections Available:**
- **Section 03:** TBD [CRN 36190](#)
INFO 6205, Program Structure and Algorithms: This class is recommended for students who have had programming experience before but lack the algorithmic approach to solving complex programming challenges. The class covers all kinds of data structures from stacks, queues, trees, graphs, and algorithmic performance complexity. In addition, the class covers various problem solving techniques such as divide and conquer, dynamic programming, randomized and greedy algorithms, backtrack search, etc. After the completion of this class you will be in a position of solve any programming problems. Though this class is optional, is highly recommended for students aiming to be software developers. There is a lot of technical work involved here, so it will be a challenge along with the Application Engineering class. Students with a strong technical background may wish to take up this challenging opportunity right away.

Sections Available:
Section 06: Sunday 10:00 AM – 1:00 PM CRN 36133

INFO 6105, Machine Learning: This class is for students planning to build a career in engineering machine learning and data science applications. The class covers the fundamentals of probability and statistics, data analysis and engineering, classification and clustering techniques, statistical inferencing, machine learning methods and tools. In a step by step manner, students will learn how to code in and make extensive use of the python programming language. Minimum expertise in programming is required to take this class. Though very demanding, this class is a good fit with the Application Engineering class for students with prior development experience.

Sections Available:
Section 08: Tuesday 10:00 AM -1:00 PM CRN 37376

INFO 7500: This class is for students planning to build a career in Blockchain technology. The class covers the fundamentals cryptography, Bitcoin, crypto-currency. Minimum expertise in programming is required to take this class. Though very demanding, this class is a good fit with the Application Engineering class for students with prior development experience.

Sections Available:
Section 02: Thursday 9:00 AM – 12:00 PM CRN 35982

Frequently Asked Questions

How do I register?: If you need help navigating to your registration worksheet on your MyNEU account please watch the following webinars for instructions on how to register using your MyNEU account:
New Registration Experience: https://registrar.northeastern.edu/article/new-registration-experience/

If you need individual help, please feel free to contact your Academic Advisor: Megan Sykes (m.sykes@northeastern.edu)

What if I already registered for classes?: Please drop them immediately, unless they are the courses listed above. As a first term student you can only take the sections of the classes listed above. If you are registered in a section whose CRN number does not match with a number above you are in the wrong section.

What if I do not get the elective I wanted?: If your first preference fills, please sign up for your second preference (and so on). The schedule is dynamic and students will continue to change their registrations up until the start of the term so there is still an opportunity for you to get into your first choice elective this Spring. Please make sure you are always registered for 8 SH if you are a full time student.

Can I take an elective other than the six listed above?: No. These classes were chosen because they are appropriate for first term students. Please refer to the advising guide to select the class most relevant to your interests.

Meeting with Professor Bugrara: You will have an opportunity to meet with Professor Bugrara, the Director of the Information Systems program and your Academic Advisor, Megan Sykes, at Orientation.

Can I skip the Application Engineering class (INFO 5100) and take it later?: No, you must take INFO 5100 this Spring. The class is essential for advancing yourself through the program and engaging in a successful co-op experience.

Am I allowed to take three courses?: No, Information Systems students are limited to two courses each term. Based on feedback from our students we found that three courses were too demanding, especially in terms of final exams and projects. All of our courses require projects that count as much as 30% of your final grade and it is extremely hard to complete three of these a term. No exceptions to this policy will be considered until after your first year.

Can I take courses from other departments?: The only other department Information Systems students are allowed to take classes from is CSYE (Computer Systems Engineering). CSYE is a sister program to IS and is being repositioned to focus exclusively on big-data technologies and programming platforms. Courses such as java, multi-threading, managing big-data projects, advanced big-data programming, as well as Scala/Spark programming will be available to IS students after your first term in the program.
**Can I transfer credit from other universities?:** No. Professor Bugrara firmly believes that all 32SH should be taken within the program at Northeastern University to uphold the integrity and continuity of the program.

**What is the duration of the Information Systems Program?:** You are required to take eight courses, for a total of 32 credits. The program takes a minimum of three semesters to complete. The typical student takes 2.5 years to complete the program, which includes an eight month Co-op.

**Is there funding or Teaching Assistant jobs available for first year students?:** Unfortunately, there are no funding options in your first year. TA positions are filled by second year students only. You are expected to be fully dedicated to achieving academic success in the first year of the program.

**Am I required to bring a laptop?:** Yes. You must bring a high-quality laptop with a minimum of 8 GB memory AND a strong (4 hour) batter life- this is required for the Application Engineering course.

**Am I eligible for Co-op?:** You are not eligible for co-op the first two semesters of your program, during which your focus will be strictly academic. You are allowed to begin your first co-op after the Fall semester ends. During your last semester of study (in your second year), you must be fully on campus as a full-time student, even if you are eligible to be on co-op. According to government rules and regulations, co-op is an educational opportunity to strengthen your engineering skills --not a job pursuit.

**How do I register for the Co-op course?:** One of the requirements to becoming eligible to go on co-op is to take ENCP 6000, Career Management for Engineers. This course will be available to you during your second semester.

**How long can I go on Co-op?:** Co-ops are a minimum of four months and a maximum of eight months.

**Will I get a bill from registering?:** Yes, your first e-bill is generated when you register for your courses. You will receive an e-bill from the University with instructions on how to pay the e-bill. If you have questions about payment, please contact the Student Financial Services office directly: [http://www.northeastern.edu/financialaid/contact/](http://www.northeastern.edu/financialaid/contact/).

**How do I get a MyNEU account?:** After you confirm your enrollment, you will be able to utilize your MyNEU portal using this link, [http://myneu.neu.edu/cp/home/displaylogin](http://myneu.neu.edu/cp/home/displaylogin). If you have not set up your MyNEU account, login to your electronic application and look for instructions to do so: [https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=neu-grad](https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=neu-grad).
For more information about beginning your program at Northeastern University, please read your acceptance letter in full.

We look forward to welcoming you to the Graduate School of Engineering!

Sincerely,

Graduate School of Engineering
Northeastern University
